January 7, 2022

Families, friends, residents and staff;

We are providing another update to inform you earlier today we tested a staff member which resulted in a positive COVID-19 test. This staff member did not work this week and through contract tracing it is believed COVID was contracted from an external person. We continue to conduct rapid antigen testing with PCR testing on Tuesday, PCR is considered the golden standard for COVID-19 results.

Visitations are allowed but each individual must be aware we have a positive staff member and entering the building comes at a calculated risk to each visitor's health.

Please remember we require a temperature between 97° and no greater than 99.4° for entry. Outside temperatures vary and will often be very low, if your temperature is below 97° visitors are asked to wear a mask and wait for their temperature to reach the required range before entry. Also, please remember:

Please do not visit if you have ANY cold or flu symptoms or experiencing any other illness.

- A mask must be worn that covers the nose and mouth while walking throughout the building
- A face shield must also be worn by visitors while walking to a resident's room
- Visitors may not associate with other residents during the visit
- Maintain social distancing from other individuals
- Do not visit if you had an encounter with a potentially positive or COVID positive individual within the last 14 days or if any new onset of illness exists.

Please do not hesitate to contact us with questions or concerns, I will be away from the building throughout the weekend but will be checking emails which is the preferred method.

Kindly,

Jeffrey Lacroix NHA, MLA, FACHCA
