Families, friends, residents and staff;

Routine COVID-19 testing identified one resident positive COVID-19 case, staff continue to test negative.

As a reminder, visitations are allowed and we request you go directly to the resident's room to visit and please socially distance from other residents.

PPE requirements change based on the locations of positive cases; currently, when visiting a resident on **2nd floor all required PPE must be worn** during the visit; goggles or face shield, gown and surgical mask. Visitors may provide their own goggles or reuse what is provided, please ensure eye protection is disinfected after leaving the building. If you provide your own eye protection it must be impenetrable to the entire eye, including the top and sides.

A special thank you to each staff member who worked on Thursday, April 14 and assisted with removing NICE residents from COVID isolation. It is a significant amount of work when a few residents transition out of quarantine, staff worked together and through teamwork pulled off a tremendous undertaking to ensure each resident was free from isolation.

Do not visit if you have ANY cold or flu symptoms or experiencing any other illness.

- A mask must be worn that covers the nose and mouth while walking throughout the building
- A face shield must also be worn by visitors while walking to a resident's room
- Visitors may not associate with other residents during the visit
- Maintain social distancing from other individuals
- Do not visit if you had an encounter with a potentially positive or COVID positive individual within the last 14 days or if any new onset of illness exists.

Please do not hesitate to contact us with questions or concerns.

Kindly,

Jeffrey Lacroix NHA, MLA, FACHCA
